

Ambu® aView™ 2 Advance

## Resounding value

A high-quality monitor at the centre of a platform for single-use flexible endoscopy

## Resounding value across multiple clinical areas

Ambu® aView™ 2 Advance is part of our single-use platform, which offers value across multiple clinical areas.

Whether it is an intensivist performing a bronchoscopy or an ENT doctor performing a flexible nasoendoscopy, you can standardise clinical areas within your institution with the same high-quality monitor available at a reasonable investment.

# Simplifies purchasing and administration

The aScope single-use endoscope platform revolves around the aView 2 Advance monitor. It helps you perform a wide range of endoscopy

procedures across clinical specialities confidently. And you only have to deal with one supplier, which you can count on to deliver.

- BRONCHOSCOPY
- CYSTOSCOPY (available by 2021)
- NASOENDOSCOPY

### **Benefit from single-use efficiency**

The aScope single-use endoscope platform enables you to cut costs associated with reusable endoscopes, such as cleaning supplies, maintenance and repairs (and the associated long-term service contracts). In fact, it may actually save money for your hospital as a whole because it improves your workflow and reduces the time and costs needed to clean reusable endoscopes. You can always count on cost transparency.

### **Extend the value of your endoscopy platform**

With aView 2 Advance, you will be able to upgrade to take advantage of the latest imaging capabilities, advanced features and future Ambu releases. Repair options are available to help extend the lifetime of your investment if an unexpected problem should occur.

## A one-stop shop you can depend on

Ambu is the world's largest supplier of single-use endoscopes. In 2009, we launched the world's first single-use flexible bronchoscope, Ambu® aScope™, and today, over 650,000 of our single-use endoscopes are used in more than 3,800 hospitals every year\*. The aView 2 Advance monitor is fully compatible with a broad portfolio of Ambu single-use endoscopes for pulmonology, ENT and, from 2021, urology.

\*Numbers are from April 2019 - March 2020

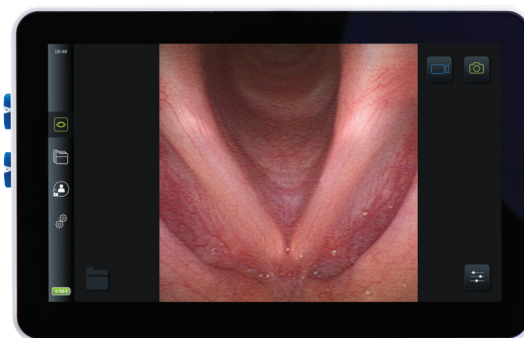

# Value for a wide range of clinical areas

This high-quality, portable full-HD aView 2 Advance monitor allows you to standardise across a wide range of clinical specialities and single-use endoscopy procedures in your hospital, including flexible nasoendoscopy, bronchoscopy and, from 2021, cystoscopy.

## A high-quality monitor

### Excellent imaging

Advanced image processing with adaptive light control on a 12.8-inch anti-reflective touchscreen with full HD resolution helps ensure continuous optimisation of the image quality.

## The Ambu single-use endoscope portfolio:

Ambu® aScope™ 4  
Broncho Slim

Ambu® aScope™ 4  
Broncho Regular

Ambu® aScope™ 4  
Broncho Large

Ambu® aScope™ 4  
with BronchoSampler

Ambu® aScope™ 4  
RhinoLaryngo Slim

Ambu® aScope™ 4  
Cysto

Available from 2021

Ambu® aView™ 2 Advance

Ambu® aScope™ 4  
RhinoLaryngo Intervention

## Streamlines workflow

### Portable

You can easily transport the lightweight monitor mounted on an IV pole with the flexible bracket or carry it using the built-in handle. It fits into small spaces, and you can rotate it 180-degrees, so you can connect it in the best position for the given clinical situation; the graphical user interface will adapt automatically.

### Plug and play

You'll see a live image within seconds of powering on the monitor, and you can take advantage of over three hours of unplugged battery-life freedom. When you're done, it's simple to clean and disinfect using commercially available wipes.

## Enables easy access to patient records for coordinated, efficient care

The aView 2 Advance monitor offers a wide range of connectivity options to support the documentation of your procedures. You can connect the aView 2 Advance monitor to the hospital network using wi-fi or via the ethernet connection and easily transfer your recorded patient imaging data to the PACS to enable access from the hospital's electronic health records (EHR).

## A history of breakthrough ideas

Ambu has been bringing the solutions of the future to life since 1937. Today, millions of patients and health-care professionals worldwide depend on the efficiency, safety and performance of our single-use endoscopy, anaesthesia, and patient monitoring & diagnostics solutions.

The manifestations of our efforts have ranged from early innovations like the Ambu® Bag™ resuscitator and the Ambu® BlueSensor™ electrodes to our newest landmark solutions like Ambu® aScope™, the world's first single-use flexible endoscope. Moreover, we continuously look to the future with a commitment to deliver innovative quality products that have a positive impact on your work.

Headquartered near Copenhagen in Denmark, Ambu employs approximately 3,000 people in Europe, North America and the Asia Pacific.
