EASY PUMP DUAL TOURNIQUET® NEW GENERATION

ref **G10904**

The **EASY PUMP DUAL® NG** tourniquet is DDM's new generation of electronic pneumatic tourniquet providing a safe, bloodless operating field for lower limb surgery. Designed with significant technological improvements to the interface compared to the previous generation, it offers users enhanced ease of use and improved patient safety.

• a model with 2 independent pneumatic circuits: the **Easy Pump Dual® G10904** for use with a single or double cuff or with 2 single cuffs. It allows 2 cuffs to be inflated at different pressures for bilateral surgery or Intravenous Regional Anesthesia: ALRIV or IVRA.

Simplified use with an improved, highly intuitive touch-screen interface:

- New settings (quick keys for time and pressure presets, languages, etc.)
- Large quality screen with better resolution: 7" IPS technology touch-screen (1024 x 600 pixels) with no viewing angle.
- Intense brightness (700cd/m²).
- Easy cleaning and disinfection thanks to Lexan on the screen.
- Highly intuitive icons for setup and use.
- Clearly differentiated zones for each circuit with very distinct color codes.

Improved patient safety:

- Model-integrated LOP function: Calculation of LOP measurement without^{SpO₂} sensor with corrective adjustment.
- Autotests upon activation to check that the apparatus is operating correctly.
- A new German-quality pump.
- Time and pressure values can be preset by default for greater customization and modified during operation.
- IVRA mode (Intravenous Regional Anesthesia) with a possible procedure guidance function.
- Leakage compensation.
- Enhanced visual and audible alarms with loudspeaker and better volume control and precision (from 0% to 100%).

Made in France:

All our tourniquets are entirely developed and manufactured in France at our production site in Agen.
The Easy Pump Dual® is the only electronic pneumatic tourniquet manufactured in France!

AN ADAPTED CUFF RANGE FOR ALL TYPES OF PATIENTS

One-piece PU arm and lower limb cuffs

One-piece PU arm and lower limb cuffs, decontaminable with 1 or 2 pockets, made of a single one-piece unit with a ribbon to secure the Velcro fastening or a strap (optional) and featuring a range of sizes identifiable by color-coding of the tubing.
